PERSONAL PROJECTS

Spotify Clone

- The Spotify Clone project is a web-based application aimed at replicating the functionalities of the popular music streaming platform, Spotify. The project was developed using HTML, CSS, and JavaScript, three fundamental technologies for building interactive and dynamic web applications.

Weather App

- The Weather App is a simple and intuitive web-based application that provides real-time weather information for a user's location. Developed using HTML, CSS, and JavaScript, the app offers an easy-to-use interface for users to check the current weather conditions.

QR Code Generator

- The QR Code Generator is a lightweight web application that allows users to create QR codes quickly and easily. Developed using HTML, CSS, and JavaScript.

Music Player

- The Music Player project is a web-based application built using HTML, CSS, and JavaScript with some featured **Music Player** system with buttons for play, pause, and back Using JavaScript Code.
