PERSONAL PROJECTS

E-Commerce Website
- Designed and developed an online store prototype using HTML, CSS, and JavaScript to demonstrate my front-end web development skills. The project aimed to create a user-friendly and visually appealing e-commerce platform.
- **GitHub Link:** https://github.com/sakshi7666/Ecommerce

Fitness Exercises App
- Designed and developed a fully functional fitness application using modern React (version 18) and integrated external APIs from RapidAPI. The project aimed to provide users with a user-friendly interface to access a diverse range of fitness exercises, enhancing their fitness journey.
- **GitHub Link:** https://github.com/sakshi7666/Fitness_Exercises_App

Weather App
- The Weather App is a simple and intuitive web-based application that provides real-time weather information for a user's location. Developed using HTML, CSS, and JavaScript, the app offers an easy-to-use interface for users to check the current weather conditions.

Music Player
- The Music Player project is a web-based application built using HTML, CSS, and JavaScript with some featured Music Player system with buttons for play, pause, and back Using JavaScript Code.
